

IMF Roasters

Coffee roasters and complete coffee processing plants

Company

IMF has been designing and producing coffee roasters and complete roasting process plants for more than 20 years, and has developed a whole range of equipment to satisfy the demand of shop and industrial roasting capacity. IMF now has a strong global presence thanks to a new concept of roasting, with perfect repeatability of roasting profiles and control of the cooling process. The application of the latest and modern technologies by maintaining conventional drum roasting concept. Since 2010 the IMF has changed and improved the corporate structure to meet the new challenges of the market. With Mr. Alessandro Garbin joining the company has greatly enriched the knowledge and experience in green coffee, alongside the high technology machines has improved the quality of the roasting process even more. The continuous research, development and attention to the evolution of technology meet with the handicraft care and thoroughness which each plant is built, installed and assisted.

Products

Here is our **product line** summary:

- roasters,
- pneumatic and mechanical conveyor systems,
- green coffee cleaners,
- dust collectors,
- silos of all shapes and sizes,
- destoners,
- mixers,
- shop grinders and industrial roll grinders,
- dosing systems,
- packaging machines.

Our **INDUSTRIAL STRUCTURE** consists in three well defined areas:

Coffee Roasting Machines - Projective and Constructive Sector

We design, engineer and build industrial and shop roasters.

Our **industrial roasters** of 30-60-120-240-480kg capacity per batch come in either manual or automatic version, with a unique management software, advanced technical solutions with high technological level, while respecting a constant research for product quality.

Our **shop roasters** of 2.5-6-15kg capacity per batch come in automatic version, with a unique management software, advanced technical solutions with high technological level, while respecting a constant research for product quality.

Ensiling Coffee Systems

Where in support of these machines there were requested silage plants, handling of coffee and grinder of small, medium and large, dimensions we are able, with the support of our technicians, to design, build and install green coffee silos, roasted coffee silos in bean or ground, completely customized according customer requirements, and being in the market with maximum efficiency and reliability, in order to satisfy every request from roasting to the packing.
